

DURACEM PUTTY FILLER H CELLULOSE FILLER FOR CEMENT & WOOD

补墙泥

DURACEM PUTTY FILLER H is a ready-to-use multipurpose quick drying filler for interior and exterior applications. It is ideal for filling cracks small holes and leveling uneven surfaces to an even and smooth finish before painting. It is fast drying, easy to apply, saves time and economical.

DIRECTION FOR USE

- ▲ Ensure that surfaces to be applied are dry, clean, free from grease and any loose adhering material.
- ▲ Apply **DURACEM PUTTY FILLER H** with a scrapper or spatula. Apply up to approximately 2-3 mm thickness and leave to harden for approximately 20 - 30 minutes depending on the substrate.
- ▲ Apply a second coat if necessary.
- ▲ Sand coating to a smooth finish after putty filler is thoroughly dried.
