## USC JOINT COMPOUND ALL PURPOSE JOINT COMPOUND

## 多功能补缝泥

**DURACEM USC JOINT COMPOUND** is a multipurpose, ready to use, light weight drywall joint compound. It is used for embedding joint tapes, finishing and smoothing gypsum panel joints, nailheads and metal corner beads. It is also used for skim coating or creating textured finish on gypsum panel surface.

- COVERAGE** : A 5kg pail of compound cover approximately 10m joints, or textures approximately 3.6m<sup>2</sup> of panel.
- DECORATING** : Drywall surfaces must be dry and free from dust before decorating.
- CLEAN UP** : Wash tools with clean water after use. Wipe dry before storing to prevent rusting.
- STORAGE** : Keep container tightly sealed. Store in a cool dry place and avoid direct sunlight
