

# 555 DURACEM SUPER HAC MORTAR

高铝砂浆灰  
(屎井灰)

**DURACEM SUPER HAC MORTAR** is a premixed cementitious single component repair and surface lining waterproof barrier mortar.

**DURACEM SUPER HAC MORTAR** is a special formulation providing structural integrity and protecting concrete, masonry and brick substrates against biogenic corrosion in strong hydrogen sulphide gas environments.

## PRODUCT SPECIFICATION

Appearance : Grey ready-to-wet powder  
Density :  $\cong 2.2$   
pH Mortar : 12.5

## Setting Time at 20°C

Initial Setting :  $\cong 4$  hours  
Final Setting :  $\cong 5$  hours

## Mechanical Strength (mpa) at 28 days

Compression : 40  
Flexural : 4.8

## ADVANTAGES

- ▲ High corrosion resistant against hydrogen sulphide gas environments.
- ▲ Resist strong hydrostatic pressure.
- ▲ Resists abrasion and mechanical wear.
- ▲ Easy to use - just mix with water.
- ▲ Can be applied by trowel or low pressure pump.
- ▲ Non flammable, no fumes, no odour.
- ▲ Environmentally friendly.
